

Ex8: Interactive Dashboards with Tableau

Aim:

To create an **interactive dashboard in Tableau** using the *Sample – Superstore* dataset that visualizes sales and profit information with charts and interactivity.

Software Required:

- Tableau Desktop / Tableau Public
- Sample Superstore Dataset (from Kaggle)

Procedure:

Step 1: Load the Dataset

Step 2: Explore the Data

Step 3: Create Worksheet 1 – Bar Chart (Sales by Category)

Step 4: Create Worksheet 2 – Line Chart (Sales Trend over Time)

Step 5: Create Worksheet 3 – Scatter Plot (Profit vs Sales)

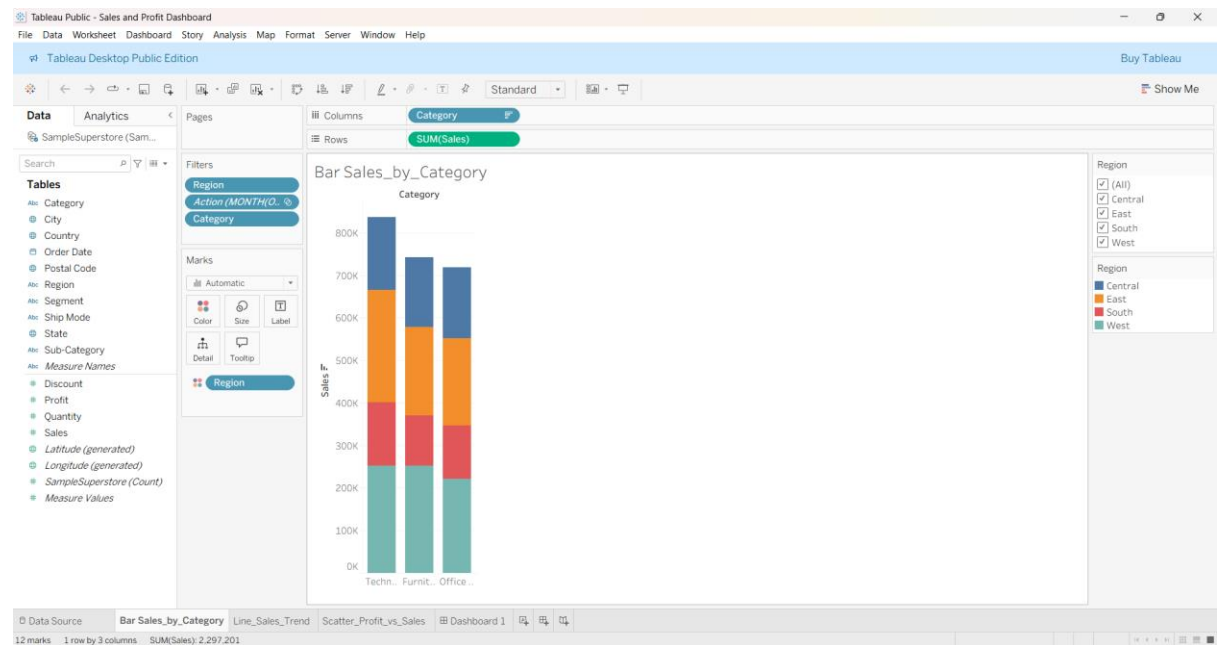

Step 6: Build the Dashboard

Step 7: Add Interactivity

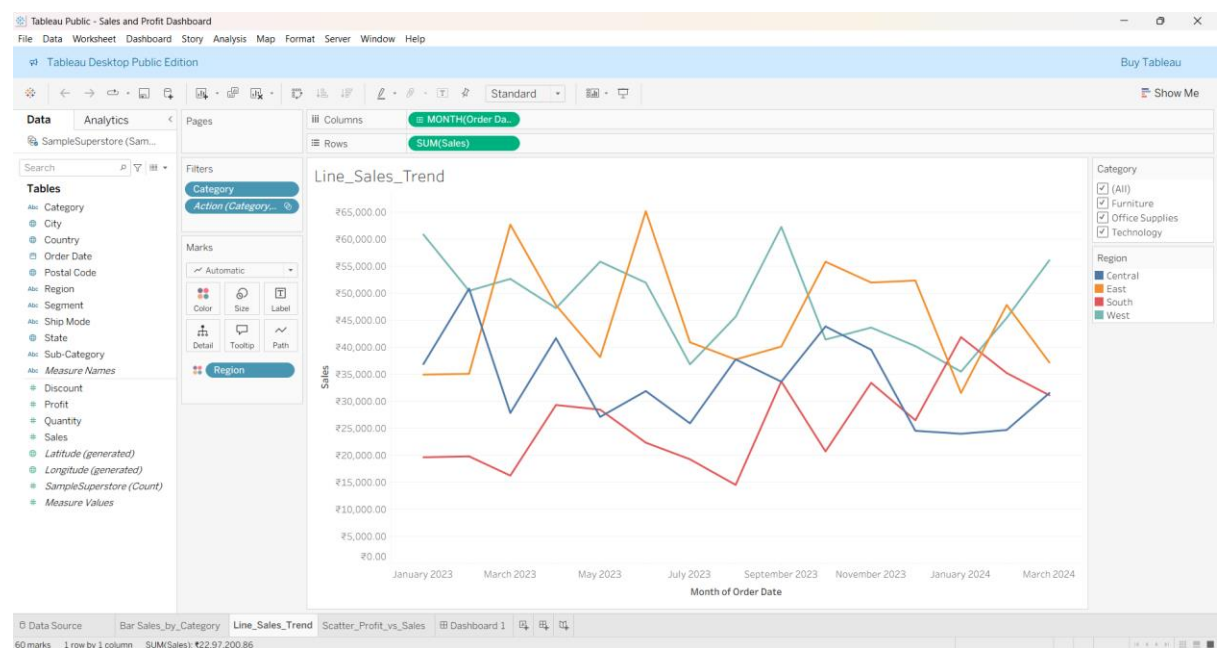

Step 8: Export / Publish

Output Screenshot:

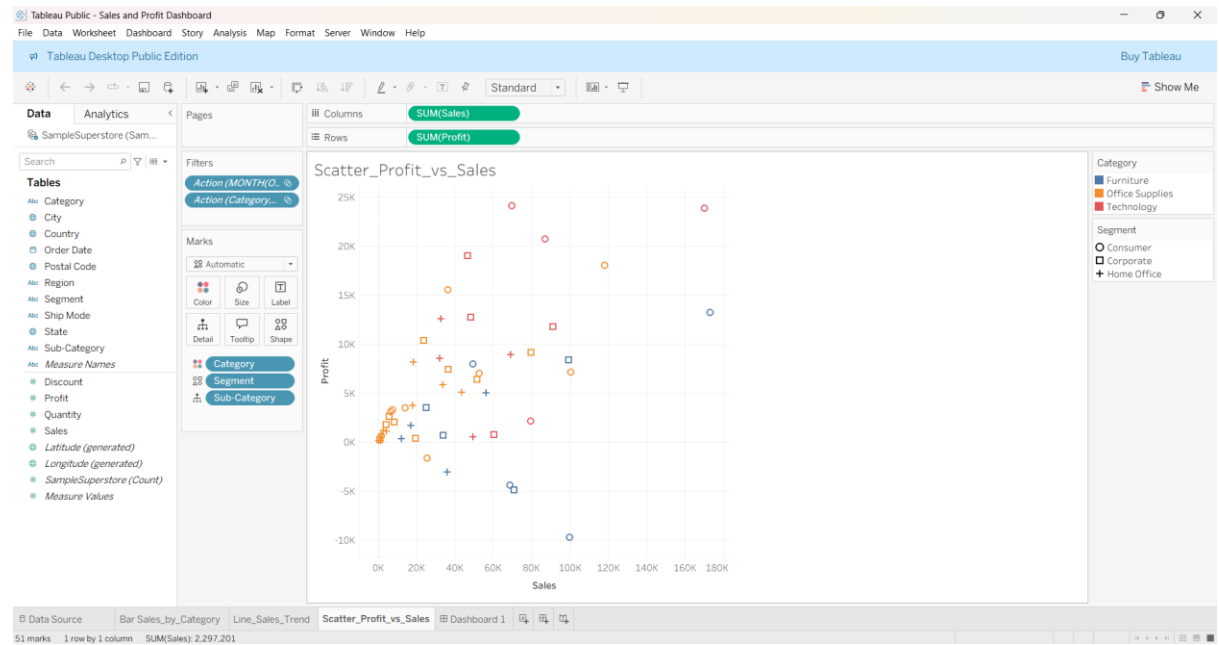

1. Bar Chart (Sales by Category)

2. Line Chart (Sales Trend over Time)

3. Scatter Plot (Profit vs Sales)

4. Dashboard

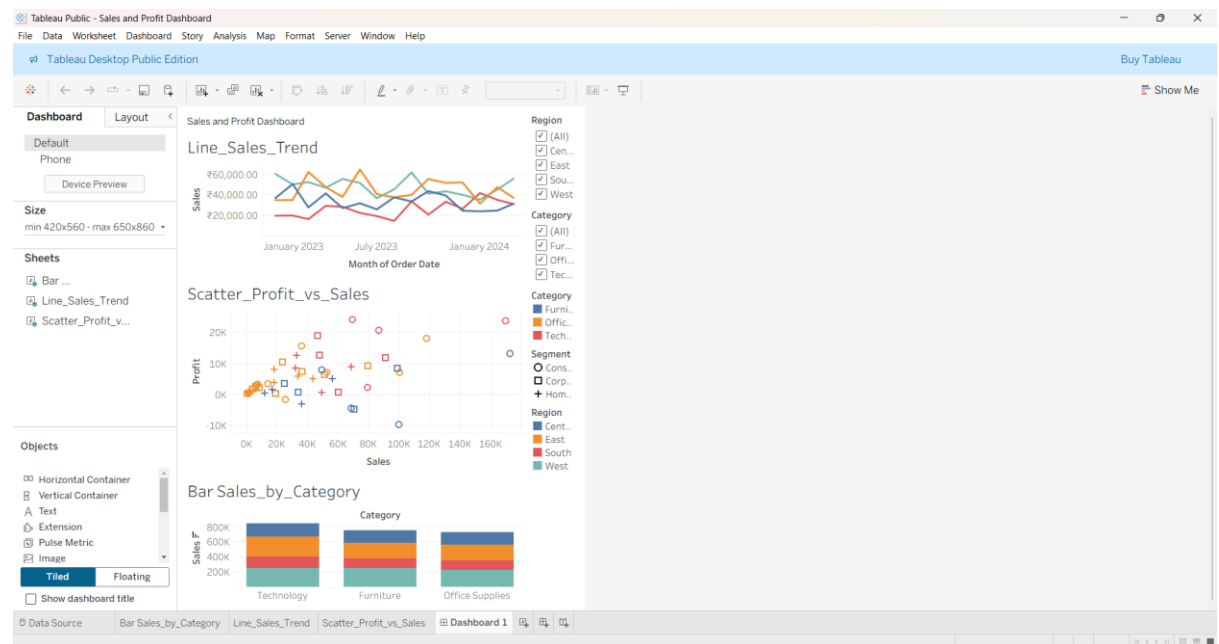

Tableau Public Link:

https://public.tableau.com/app/profile/balaji.r1861/viz/SalesandProfitDashboard_17606220289620/Dashboard1?publish=yes

Result:

An **interactive Tableau dashboard** was successfully created showing:

- Bar chart for *Sales by Category*
- Line chart for *Sales trend over time*
- Scatter plot for *Profit vs Sales*
with filters and interactive dashboard actions.
